

# Zoonoses 2023 - International Symposium on Zoonoses Research

## Monday, 9 October 2023

### Session 2: Vaccines & Immunology - MOA 6 (15:30 - 17:00)

time	[id] title	presenter
15:30	[206] Exploring bat innate immune cell responses to filoviruses	Dr YORDANOVA, Ivet A.
15:45	[260] Toxoplasma gondii attenuated by low energy electron irradiation induces protective immune responses	FINKENSIEPER, Julia
16:00	[257] Mice immunized with different recombinant West Nile virus proteins show varying levels of serological cross-reactivity and protection from infection	WEISS, Rebecca
16:15	[184] Neutralization of the hepatitis E virus by porcine serum antibodies in a cell-culture based assay	GREMMEL, Nele
16:30	[244] Improving Clinical Trials for Candidate Vaccines Against AMR Infections: Perspectives from the COMBINE Project	Dr MARCHIORO, Linda
16:45	[279] Consequences of Ascaris-Salmonella co-infection on immune functions in the pig	MIDHA, Ankur
