

Zoonoses 2023 - International Symposium on Zoonoses Research

Monday, 9 October 2023

Session 4: Host-pathogen interactions 1 - MOA 6 (18:30 - 20:00)

time	[id] title	presenter
18:30	[288] Cross-talk between glyphosate resistance, bacterial stress response and pathogenicity traits in <i>Salmonella enterica</i>	Prof. MAKAROVA, Olga
18:45	[197] Cell-intrinsic genomic reassortment of pandemic H1N1 2009 and Eurasian avian-like swine influenza viruses results in potentially zoonotic variants	FRIEDRICH, Marcel Edgar
19:00	[223] Multivesicular bodies and the hepatitis E virus life cycle – more than just release?	Dr GLITSCHER, Mirco
19:15	[242] Cryo-electron tomography of influenza A and Ebola virus cell infection	Dr CHLANDA, Petr
19:30	[245] A study of the interaction of insect-specific viruses from Bunyavirales with the mosquito host and the mosquito-transmitted Rift Valley Fever Virus	Ms JAGTAP, Swati
19:45	[255] NETosis during Influenza: A potential risk factor for severe bacterial co-infection in pigs?	Mr LASSNIG, Simon
